SUMMARY

Full-stack engineer with 4+ years of experience building scalable web, cloud, and AI-powered applications using **Next.js and Node.js**. Proven track record in developing high-performance systems. Passionate about creating innovative, efficient, and user-focused software solutions.

PROFESSIONAL EXPERIENCE

Software Engineer Oct 2023 – Present
Shanda Studio Washington, D.C., United States

- **Full-Stack Development**: Developed and maintained full-stack applications using Next.ts and Node.js (Express), serving 5,000+ active users with complete client satisfaction.
- **Collaborated directly with internal AI research teams** to provide **relevant user feedback** and **iterate** on **LLM pipeline** features for transcription and audio enhancement, which reduced podcast editing time by **70%** and improved core model performance for **1,000+ minutes** of monthly audio.
- **Own the development** of **customer-facing** features and product experiences end-to-end, engineering and deploying scalable **RESTful APIs** using **Python** and **AWS** that supported **5,000+ active users** while maintaining **99.99% uptime** and optimizing for speed.
- **Media Processing Engine**: Engineered media editing features with FFmpeg, cutting file sizes by 15% and processing time by 20%, with automated metadata and cover art integration.
- **Cloud Deployment:** Deployed and managed AWS cloud infrastructure, achieving **99.99% uptime**, secure access, and optimal performance.
- **RSS-Based Podcast Publishing:** Delivered advanced podcast hosting and publishing systems with global accessibility, enabling **syndication to platforms like Spotify & Apple Podcasts** for **30+ active podcasts**.
- **Subscription & Payments**: Designed a highly scalable **relational database schema** (MySQL) for user authentication, subscriptions, and Stripe payments, securely managing **1,000+ user records** and processing **200+ monthly transactions** without failure.
- **Established and maintained a successful, long-term remote collaboration as an independent developer**, delivering 100% of milestones on time, resulting in 3× scope expansion and continuous engagement through consistent, high-quality output.

Software Developer Jul 2020 – May 2025
Freelancing Cairo, Egypt

- **SaaS Platform**: Built a real-time usage tracker and performance monitor with React.js, Node.js, Socket.IO , and Sequelize, minimising client issue response time by **60%** and improving visibility across **all active sessions**.
- **Database and Admin Panels**: Designed and optimised MySQL databases and admin dashboards with Next.js, cutting manual data tasks by **70%** and enabling real-time control for **multi-user systems**.
- **Real-Time Applications**: Constructed low-latency apps with WebSockets and Express.js, maintaining **smooth live updates** under high traffic and ensuring **<100ms response times** in production use.
- **Media Processing Tools**: Created encoding and editing programs using **FFmpeg**, **Python**, and **JavaScript** to process **10,000+ media files**, automating **80% of manual editing tasks** and improving speed by **5×**.
- **AI & LLM Solutions**: Programmed AI-driven apps using TensorFlow, OpenCV, and LLM pipelines for face recognition, image manipulation, and automated content tagging, increasing automation efficiency by **60%**.

Achievements

- Top-rated Freelancer on Upwork (Job Success Score 100%)
- Level one Freelancer at Fiverr.com (overall rating 5/5)
- Successfully finished 30 projects (35% long-term)

PROJECTS

Web-Based Video Editor
Developed a user-friendly video editing platform with a multi-layered timeline, real-time previews, and AI-powered tools, enabling smooth editing and high-quality exports, while decreasing editing time by 50% through cloud-accelerated rendering.
Skills: JavaScript, React, WebGL, HTML5 Canvas, CSS3, FFmpeg, Node.js, GCP, Serverless, Imagen, GCS

Complete Greet
A powerful platform that enhances customer interactions through a real-time smart widget—boosted user engagement by 40%, improved satisfaction scores by 30%, and delivered insights from 10K+ sessions.
Skills: JavaScript, WebSockets, Node.js, Express, Sequelize, UI/UX Design, DigitalOcean

Space Truss
Built an interactive program to solve statically indeterminate space trusses—automating structural analysis, increasing productivity by over 90%, and providing real-time 3D visualisation of geometry and loads.
Skills: Finite Element Analysis, Three.js, HTML5, CSS3, JavaScript

EDUCATION

Bachelor of Engineering (Grade: B) 2024
Cairo University Cairo, Egypt

TECHNICAL SKILLS

Website development, **Servers deployment and maintenance**, **Data analytics**, **C/C++/C#**, **MySQL**, **Python**, **FFmpeg** (Video and image Encoding), **Socket.io** (Real-Time applications), **React**, **Batch**, **Node.js**, **JavaScript**, **TypeScript**, **SQL**, **Microsoft office tools**, **WebGL**, **Problem Solving**, **AWS**, **Azure**, **AI Tool Proficiency**, **GCP**, **Next.js**, **DevOps**, **Git**, **Docker**, **Express.js**, **Cloud Computing**, **Serverless computing**, **RESTful APIs**, **CI/CD**, **Nginx**, **Linux Shell**, **VPS**, **AI-assisted automation**, **Stripe**, **LLM Pipelines**, **Figma**, **Design Systems**, **MCP**
